How did you hear about The Luxury Pet?

Is it OK to use photos of your pet on The Luxury Pet, LLC and or fliers?

Circle One Yes/No

Vet's Name:  
Vet Clinic Name:  
Vet Phone Number:  
Vet Street Address:

Please Initial:

\_\_\_\_\_ Although we are a one on one grooming facility, at times dogs from different households may be commingled in common areas, under constant and direct supervision.

\_\_\_\_\_ In boarding/training facilities and grooming facilities, pet animals of different ownership may be housed in the same enclosure, under constant and direct supervision.

\_\_\_\_\_ Grooming facilities may not administer tranquilizers, sedatives, or any other pharmaceutical drugs designed to calm an animal during grooming.

\_\_\_\_\_ Occassionally, grooming can expose a hidden medical problem, allergy, or sensitivity unknown to us or aggravate a current one. This can occur during or after grooming. Prior to grooming, please inform us of any pre-existing conditions including but not limited to skin allergies, shampoo allergies, moles, clipper sensitivity, matting, tics, fleas, fear, behavioral issues, bone and joint sensitivity, surgeries, heart conditions, seizures, etc.

\_\_\_\_\_ Tangles and matts cause your pet to be at a greater risk of injury, stress, and

trauma. All precautions will be taken. Pets with matted coats need extra time and attention. Mats left in the pet's coat grow tighter and can strangle a pet's skin to the point of causing skin tears. Torn skin from mats can even harbor maggots. Mats can be very difficult to remove and may require your pet to be shaved as gently as possible. Heavy matting can also trap moisture, feces, and urine near the pet's skin allowing mold, fungus, and/or bacteria to grow. Grooming can expose these hidden conditions.

\_\_\_\_\_ Even while taking care, problems occasionally arise, during or after grooming, such as nicks, clipper irritation, and mental or physical stress. Close shave and/or matt removal can result in itchiness, skin redness, self-inflicted irritations (i.e. scratching with fresh cut nails), abrasions, and failure for hair to regrow.

\_\_\_\_\_ Shaved pets are prone to sunburn and should either have sunscreen applied daily or be kept out of the sun until the hair regrows enough to protect the skin.

\_\_\_\_\_ In some cases, pets may experience brief behavioral changes.

Prevention is the best defense against matting by scheduling regular grooming appointments.

\_\_\_\_\_ Shaving matted dogs results in the dulling of blades which will require professional sharpening. Brushing and combing out mats adds skill and time to the groom. Therefore, dogs that require dematting will be charged a dematting fee.

In the best interest of your pet, we request permission to obtain immediate veterinary treatment should it become necessary.

\_\_\_\_\_ I hereby grant permission to The Luxury Pet, LLC to obtain emergency veterinary treatment for my pet at my expense. Also, realizing that matted pets have a greater chance of injury during grooming and that grooming can expose hidden medical issues and aggravate existing medical issues, I will not hold this grooming establishment, its owners, operators, employees, volunteers, and independent contractors responsible for accident or injury to my pet

\_\_\_\_\_ I agree to hold The Luxury Pet, LLC, it's owners, operators, employees, volunteers, and independent contractors harmless from any damage, loss, or claim arising from any condition of the undersigned pet, either known or unknown to The Luxury Pet, LLC. This agreement is for any and all pets groomed.

I hereby certify that I am the owner or the authorized agent of the owner:
